SHOHREH DESIGN

Your first 3 AI agents.

Set up in minutes.

AI Content Team Starter Kit

A researcher, a copywriter and a reviewer. They work together inside Claude Code and write in your voice.

Free from Shohreh Design.

What you get in this kit.

Three agents and two skills. Each one has a single job.

Researcher Agent	**Trained to collect facts and never invent any.** Pulls the facts for your topic from your sources and hands them to the copywriter.
Copywriter Agent	**Trained to write hooks that sound like you.** Turns the facts into a hook and a caption in your brand voice.
QA reviewer Agent	**Trained to catch small mistakes before you do.** Checks the draft against the facts and sends it back if something is off.
plain-voice Skill	**Trained to remove the signs of robot writing.** Plain everyday words, short sentences, no hype.
hook-writer Skill	**Trained to give you strong hook options for one idea.** Five hook candidates from your facts, built on six patterns.

Plus one rules file, `CLAUDE.md`, that tells Claude how the team works together.

And `brand/voice.md`, where you describe how your brand sounds.

What is not in this kit

This kit is the writing slice. Our full system has more:

Design and graphics	Video and sound	Scheduling and posting
Automations	Live status views	Approval gates

What you need before you start.

You need a few things on your computer. Most people already have them.

Claude Code

This is the tool that runs the agents. Install it from the official Anthropic site, claude.com/claude-code. Use version 2.1.118 or newer. To check, open a terminal and type:

```
claude --version
```

Your own Claude subscription

The kit is free. The agents run on your own Claude account or API access, so your usage counts there. The kit does not include any.

Git

Git copies the kit to your computer. To check, type:

```
git --version
```

A few quiet minutes

The first run uses a made-up example brand, so you can start right away. Later you describe your own brand voice in one short file. The better you describe it, the better the writing.

No coding needed. You will copy and paste a few lines.

Set up in three steps.

Open a terminal and follow along. It takes a few minutes.

1

Get the kit

Paste these two lines:

```
git clone https://github.com/SHOHREHDESIGN/ai-content-team-starter.git
cd ai-content-team-starter
```

2

Start Claude Code in that folder

Run `claude` and accept the prompt to trust the folder. The three agents and two skills load automatically from `.claude/`.

```
claude
```

3

Run the team on the example

Paste this into Claude Code:

```
Run the content team on examples/facts.md. Topic: "Why a steady wake-up time
beats a perfect bedtime". Platform: Instagram Reel.
```

You get a hook, a caption, a fact map and a QA verdict, saved in `output/`.

Your first run, start to finish.

The kit comes with a made-up example brand and offline facts, so you can watch the team work before you add your own.

1. **The researcher** collects the facts for your topic. It never invents any.
2. **The copywriter** writes a hook and a caption.
3. **The QA reviewer** checks both against the facts. If something is off, the copywriter gets another try.
4. **You** get the result in `output/`. Nothing is posted for you.

What comes out

Notice: brand/voice.md is not filled in yet. This draft uses a neutral fallback tone.

64% said this was the single most useful change. It wasn't their bedtime.

In a self-reported member survey, 64% of completers said keeping the same wake-up time every day, including weekends, was the single most useful change they made. Only 23% said an earlier bedtime was what helped most.

The reason, from Day 4 of Evening Reset: a steady wake-up time gives your body one fixed anchor. A "perfect" bedtime shifts with however the evening goes.

Fact map: every claim points to a source line, for example "Only 23% said an earlier bedtime was what helped most" comes from F7.

QA verdict: PASS
2 revision rounds

Real output from a test run, shortened. Example brand: Fernhill Sleep Studio, made up.

Make it yours

1. Open `brand/voice.md`, fill in the sections, and change the first line to `STATUS: FILLED`.
2. Replace `examples/facts.md` with your own facts, one per line with an ID, or paste your facts into the chat.
3. Ask for the topic and platform you need.

No facts yet? The team asks you for a source. It does not make facts up.

How the full team works.

This kit is one slice. Here is the whole picture.

Our full system has more than twenty roles. Each role has one craft and a written rulebook. They hand work to each other in a clear order, and nobody checks their own work.

What the full team adds

- Strategy and research that plan each post
- Design for carousels, thumbnails and pages
- Video, sound and motion for reels
- DM automations that turn comments into leads
- A quality gate that checks every piece before it moves on

Who decides

A human always has the last word. Vic, our creative director, gives the final yes before anything goes out.

What you do

You share your goal and your brand. We set up the team and run it for you. You get finished content.

Want the full system, done for you?

You have seen one slice work. Want the whole team running for your brand?

DM us FULL on Instagram

@shohreh.design

Send the word FULL and we take it from there.

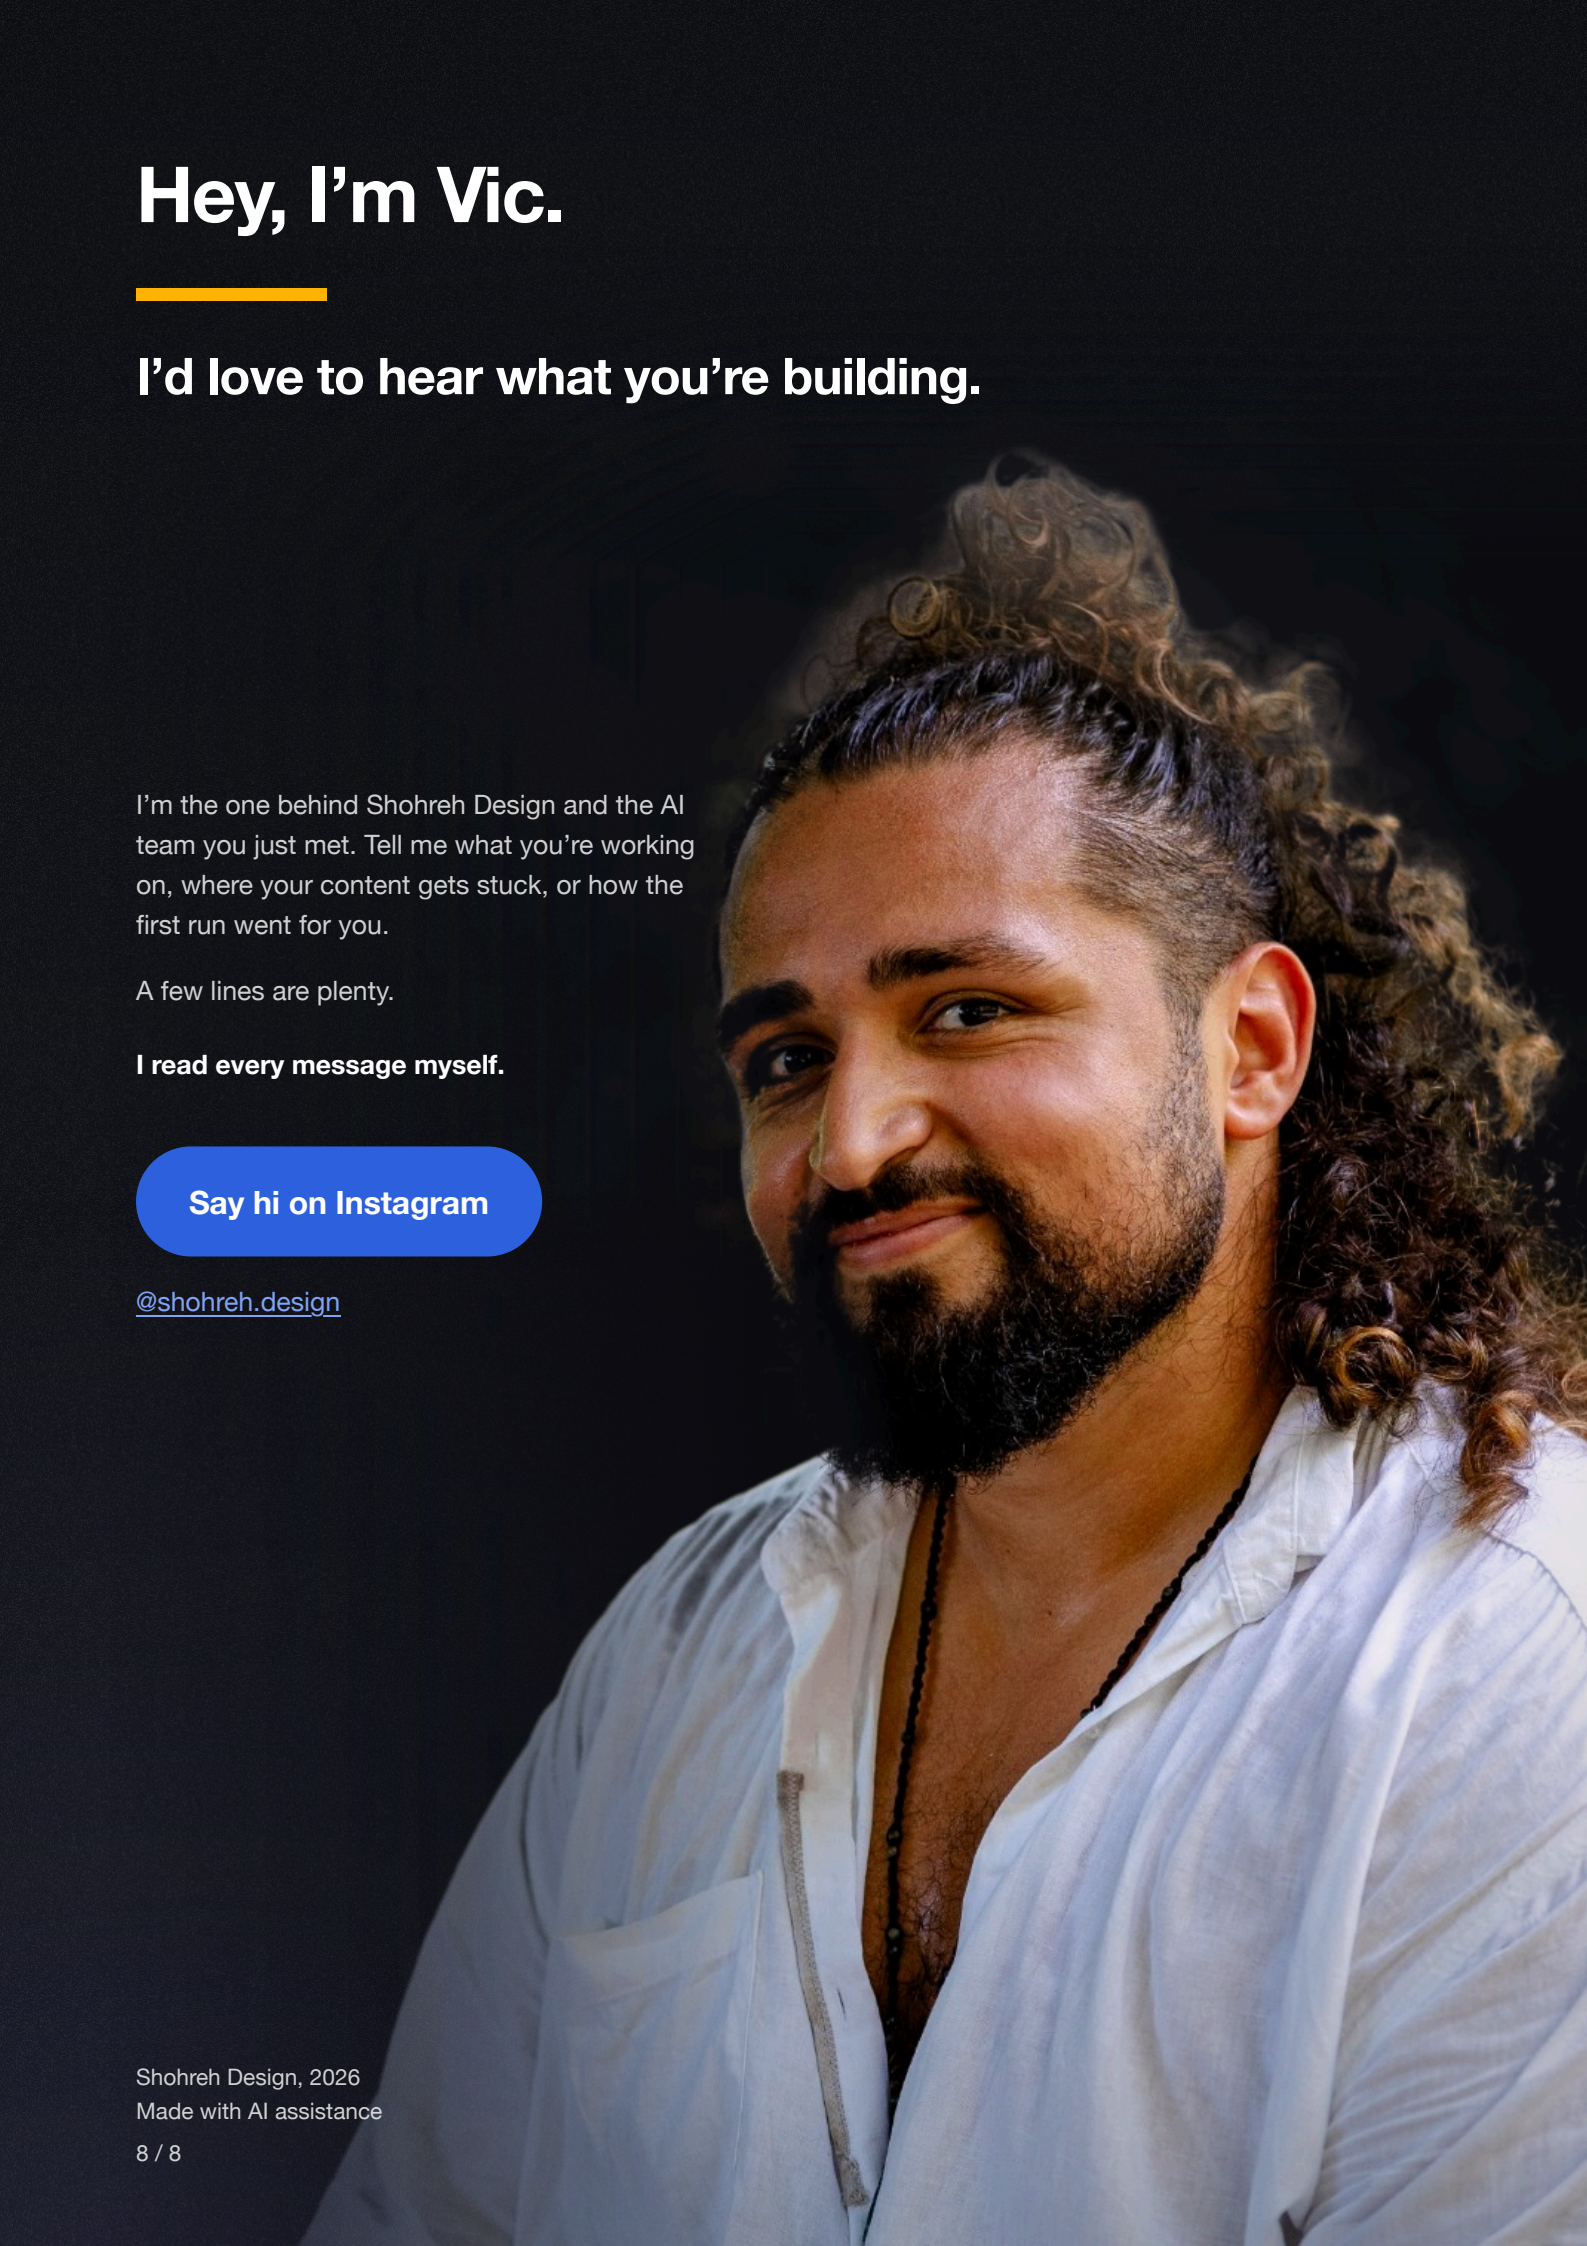

The starter kit is free to use for your own brand. Please do not resell or share it as your own product.

SHOHREH DESIGN

shohreh.design

Hey, I’m Vic.

I’d love to hear what you’re building.

I’m the one behind Shohreh Design and the AI team you just met. Tell me what you’re working on, where your content gets stuck, or how the first run went for you.

A few lines are plenty.

I read every message myself.

Say hi on Instagram
